Aboriginal Population Growth

Hamilton

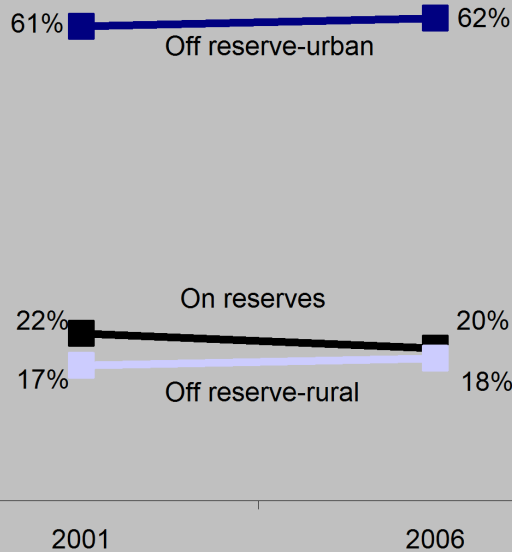

A Steady Increase

The number of people who identified themselves as an Aboriginal person has increased steadily in this region. Most of this growth can be attributed to a high birth rate. There are also more individuals identifying themselves as an Aboriginal person, and there has been a reduction in the number of incompletely enumerated Indian reserves since 1996.

Location Patterns

Aboriginals by place of residence
Ontario, 2001-2006

Urbanization

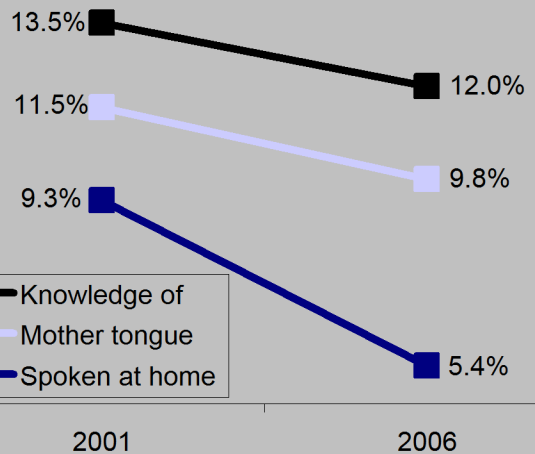

The Aboriginal population is increasingly urbanized. In 2006, 62% lived in an urban centre, a slight increase from 2001. Urban areas include large cities, or census metropolitan areas, and smaller urban centres. The share of aboriginal people living on reserves has decreased to 20% in 2006, while the share living in rural areas has increased slightly.

Fading Languages

There has been substantial erosion in the use of Aboriginal languages in recent decades. In Ontario, the share of Aboriginals who most commonly speak an Aboriginal language at home and the share whose mother tongue is Aboriginal, both dropped between 2001 and 2006. However, more people had a knowledge of an Aboriginal language than had an Aboriginal mother tongue. This suggests that some speakers must have learned their Aboriginal language as a second language. It is thought that the process itself of learning an Aboriginal language may contribute to increased self-esteem and community well-being, as well as cultural continuity.

Language Trends

Aboriginal Concentrations

Self-identified Aboriginals as share of the total population: South-Western Ontario census divisions, 2006

Population Proportions

Although Ontario leads all provinces with 21% of Canada's aboriginal population, the aboriginal share of Ontario's total population is quite low at 2%. The Hamilton census division has a lighter than average concentration of Aboriginal people at 1.5% of the general population.

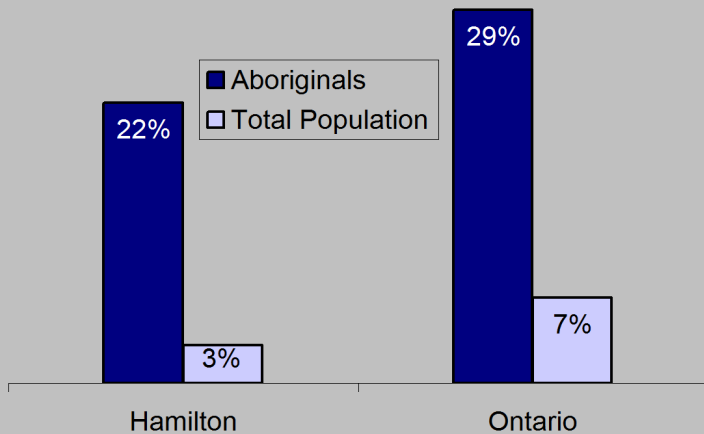

A Youthful Population

The Aboriginal population is much younger than the general population. Children and youth of this region aged 24 and under made up 43% of all Aboriginal people, compared with 32% of the general population. Nevertheless, like the total population, the Aboriginal population is slowly getting older. The number of Aboriginal seniors, while relatively small, doubled between 2001 and 2006. This aging of the Aboriginal population is due to declining fertility rates and gradual improvements in life expectancy. However, fertility rates remain higher than average and life expectancy still lags behind that of the total population.

Growth Rates

Aboriginals and total population 2001-2006
Hamilton and Ontario

High Growth

The Aboriginal population has grown faster than the non-Aboriginal population. Between 2001 and 2006, it increased 22% in this region, over seven times faster than the 3% rate of growth for the general population over the same period. Collectively, Ontario experienced a similar trend.

Median Ages

Hamilton and Ontario, 2006

	Aboriginals	Total Population
Hamilton	30	40
Ontario	30	39

A Low Median Age

The median age is the point where one-half of the population is older, and the other half is younger. In 2006, the median age for Hamilton's Aboriginal populations was significantly lower than that of the general population. This contrast of median age is also found provincially.

Aboriginal Composition

Population by Aboriginal Group
Hamilton, 2006

Changing Composition

Of the three Aboriginal groups, the fastest gain in population between 2001 and 2006 occurred among those who identified themselves as Métis. In this region, their numbers increased 65%, to an estimated 1,530. The North American Indian population also grew quickly at 17% from 2001 to 2006 and now totals 5,730.

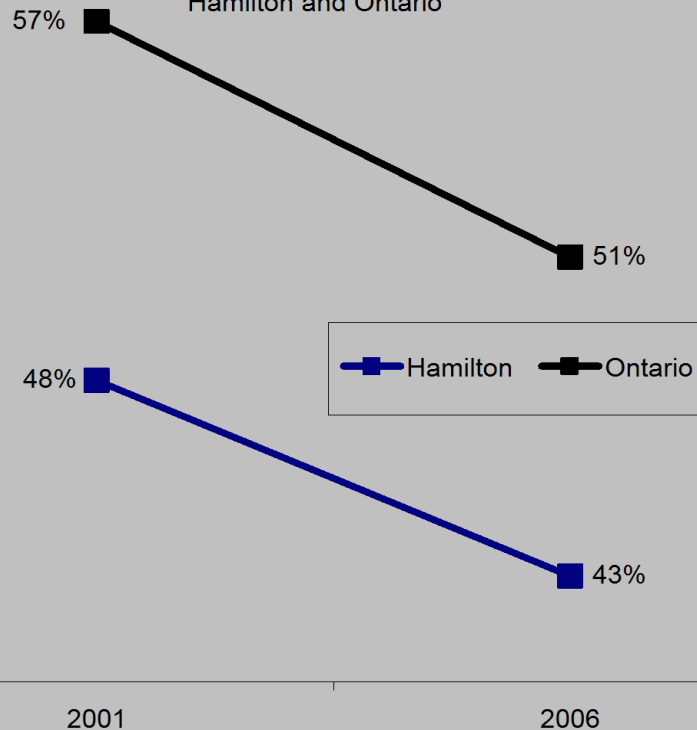

Consequently, the share of the Aboriginal population who identify as Métis has grown steadily. In 2006, they accounted for one in five (20%) of Aboriginal people, up from 15% in 2001. First Nations people accounted for the majority (75%) of Aboriginal people in 2006.

Registered / Treaty Status Declines

Registered Indian refers to those persons who reported they were registered under the Indian Act of Canada. Treaty Indians are persons who are registered under the Indian Act and can prove descent from a band that signed a treaty. Though this region has a lower proportion, there has been a significant decrease in the share of registered/treaty Indians amongst aboriginals here and province wide. A majority of registered and treaty Indians in Canada reside in one of approximately 900 small First Nations communities.
